

TC06

Cylindrical swing turnstile

Technical parameter

type:cylindrical

motor and controller:servo

body material:304 stainless steel

swing arm material:acrylic

lande width:60-90cm

MCBF:10 million life time

passage direction:bidirectional/unidirectional

working temperature:-30 to +60

working humility:0-95%

application scenarios:supermarket,office

open door signal:relay from access controller
